Student Number: 227284240

I am a current Bachelor of Information Technology student at Nelson Mandela University. I have acquired an intricate, but sound, persona through various prestigious positions at school as well as encountering people bearing the same nature.

In my final year of High School, I served on the School Governing Body as the Representative Council of Learners President. Alongside the Principal and the respective school stakeholders, I oversaw matters including Academic success, Cultural diversity, financial stability and Student Wellness. I also was elected Head Boy, one of the four Head Prefects and with my team of Prefects, we guided the school towards a more disciplined, fair and intellectual system.

My coding journey started off with Delphi, an old language that taught me the foundation of programming. During University, I continued to practice my programming abilities in effort to master the basics and move on to challenging concepts.

CORE SKILLS

- | | |
|----------------------|---|
| ❖ Analytical Thinker | ❖ Leadership |
| ❖ C# | ❖ Microsoft Access, Word, Excel and Outlook |
| ❖ CSS3 | ❖ MySQL |
| ❖ HTML5 | ❖ JavaScript |

VOLUNTARY EXPERIENCE

Care Haven Psychiatric Centre [2018]

Care Haven is an old age home located in Central, Eastern Cape. In my voluntary hours, I was tasked with helping in the community kitchen, garden work and keeping the elderly company.

Events Coordinator ~ NMU Computer Society [2024]

The Nelson Mandela University Computer Society is branch of the School of IT that fosters innovation, technological growth and computing advancement amongst its members and the Nelson Mandela University Community.

As the Events Coordinator, I facilitated the planning of various events in partnership with the respective stakeholders such as S4 Integration for the annual hackathon.
